**Exhibition
Department of Physics
Report**

The Department of Physics had the privilege of participating in the Quillon Knowledge Festival, an educational exhibition on sustainable education, organized by Quillon Edu City and Peace Public School from **February 26 to 29, 2024**, at **Peace Public School**. This event was designed to engage young students with hands-on demonstrations and activities centered on sustainability in education, aligning with our mission to foster scientific curiosity and promote awareness about sustainable practices in science.

Over the exhibition, our students presented a range of interactive working models and conducted live experiments, effectively translating complex scientific concepts into accessible learning experiences for school students.

The exhibition received an enthusiastic response, particularly from younger students, who were captivated by the live experiments and models on display. These interactions allowed our student presenters to refine their communication skills and gain confidence in public speaking and scientific demonstration. Additionally, the event served as a platform to enhance awareness on the importance of sustainability, encouraging students to consider the environmental impact of scientific practices and innovations.

Overall, our participation in the Quillon Knowledge Festival proved to be an enriching experience for both our students and the attendees. The program fulfilled its objective of engaging the local school community in meaningful scientific dialogue, while also providing our students with valuable experience in outreach and science communication. We extend our gratitude to Quillon Edu City and Peace Public School for hosting this impactful event, and to our students, IEDC TKMCAS and faculty for their dedication in making our participation a success.
