

CAREER GUIDANCE

MOVING TOWARDS KNOWLEDGE SOCIETY

On March 01 2024, Dr. Joshy Joseph, Principal Scientist and Associate Professor at NIIST, Trivandrum delivered an insightful seminar to college students on the topic of "Science Education and Career Advancement". The event, organized by the Dept. of Chemistry aimed to provide students with a comprehensive understanding of how science education can shape their future career paths and the various strategies they can employ to succeed in a competitive job market. The seminar began by emphasizing the significance of science education, not only as a foundation for technical knowledge but also as a driver of critical thinking, problem-solving, and innovation. He discussed the evolving role of science in addressing global challenges, such as climate change, health, and technological advancement, highlighting that today's students have a unique opportunity to contribute to these areas.

In the second part of the session Dr. Joseph explored a wide range of career options available to students pursuing science, from traditional roles in research and academia to emerging opportunities in fields like biotechnology, data science, and environmental science. He encouraged students to remain open-minded about diverse career paths, pointing out that science is a broad field with intersections in almost every industry.
